## Paging Slim System

HOSPITALITY SOLUTIONS

**Wi-SERVE system**  
extend your reach

### What is Wi-Serve?

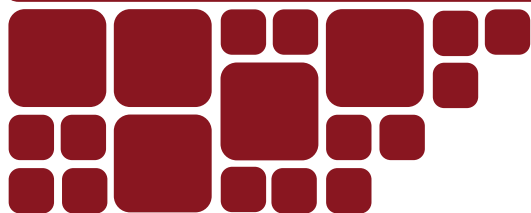

Wi-Serve stands for "wireless service" is the utilisation of wireless technology to extend your reach in serving our guests more efficiently.

**Wi-Serve Paging Slim System** was developed to aid restaurant operators to systematically contact their guests while maintaining a pleasant and quiet environment.

It caters to a wide range of operations. You could contact your guests by paging them when their order is ready for collection or when their table is ready to be seated. There are three options to alert your guests - flash, beep or vibrate.

You could complement your operations further with Wi-Serve Table Call Paging System and Wi-Serve SMS/MMS Marketing Communication to support your service staff and increase repeat visits respectively.
