

Wi-Serve

Table Call Watch / Display Queue Management System

HOSPITALITY SOLUTIONS

Wi-SERVE system
extend your reach

What is Wi-Serve?

Wi-Serve stands for “wireless service” is the utilisation of wireless technology to extend your reach in serving our guests more efficiently.

Wi-Serve Table Call Watch / Display Queue Management System was designed to help guests to contact their servers direct from their table. No more hand waving.

Guests can now push a button (one button or three button mode is available) on the table unit to contact the server. A message will be transmitted to the watch or display, informing him the specific table number or type of service requested.
